EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT)

Hyderabad, India

B.E. in Computer Science and Engineering; CGPA: 9.74/10.00

2024 – 2028

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, SQL

AI / GenAI: LLMs, AI Agents, Multi-Agent Systems, Prompt Engineering, AI API Integration, Gemini, Groq, Ollama, Claude AI, ChatGPT

Backend / Data: FastAPI, REST APIs, Supabase, MySQL, TanStack Query, Real-Time Data Sync

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, Recharts

Tools: Git, GitHub, Vercel, VS Code

DSA: 200+ LeetCode problems; Dynamic Programming, Game Theory, Divide and Conquer, Arrays, Hash Tables, Two Pointers

PROJECTS

Buy or Wait? – AI Affordability Decision Agent

[GitHub](#)

Python, Gemini, Groq, Deterministic Simulation Engine

HackerRank Orchestrate, Sept 2026

- **Architected** an AI-powered financial decision agent recommending full payment, installments, or waiting by forecasting 90-day cash flow from bank ledgers, messages, and receipt images.
- **Designed** a strict LLM/deterministic boundary where Gemini and Groq extract facts from unstructured evidence with prompt-injection defenses, while a 4-tier reconciliation engine and cash-flow simulator execute as auditable, deterministic Python.
- **Diagnosed** a cash-flow safety-window boundary bug and realigned validation to the transaction completion horizon, increasing affordability-decision accuracy from **72% to 88%** on held-out samples.
- **Ranked #93 of 35,712** registered developers, earning a Silver medal and placing in the top 5% of 3,062 interview finishers with a 23.1/30 AI-judge interview score.

KrishiCFO – Multi-Agent Agricultural Price Intelligence

[GitHub](#)

Groq, Bhashini, Prophet, FastAPI, Next.js, Supabase

- **Built** a multi-agent AI system with a 3-member team for the AI4Impact hackathon, delivering agricultural price intelligence through a **Telugu voice-first interface** powered by a Bhashini STT/TTS pipeline.
- **Integrated** Prophet-based price forecasting with a FastAPI backend and a Next.js/Supabase dashboard for agritech data visualization and decision support.

HabitTracker

[Live Demo](#)

React, TypeScript, Supabase, TanStack Query, Recharts, Vercel

- **Engineered** a full-stack habit-tracking platform with secure authentication, streak tracking, a **Supabase real-time backend**, and TanStack Query/Recharts analytics dashboards; deployed on Vercel.
- **Integrated** an **AI recommendation engine** that analyzes user activity history to generate personalized habit-improvement suggestions.

CERTIFICATIONS

Programming with Generative AI – NPTEL (Completed)

Artificial Intelligence & Machine Learning – Apna College (Ongoing)

LEADERSHIP & INVOLVEMENT

CBIT Developer Student Club (CBIT DSC)

Hyderabad, India

AIML Techie

2024 – Present

- **Collaborate** with peers in workshops and build sessions focused on applied AI, software engineering, and emerging development tools.
- **Contribute** to technical problem-solving activities and discussions around AI/ML tooling and software development.

ACHIEVEMENTS

Earned a **Silver medal**, ranking **#93 of 35,712** registered developers at **HackerRank Orchestrate** (Sept 2026), a 24-hour AI-agent hackathon – up from #516/1,982 in the August edition.

Solved **200+ Data Structures & Algorithms problems** in C++.

Maintained a **9.74/10.00 CGPA** while independently building and deploying 3 full-stack AI-integrated applications.
